

FAILURE INVESTIGATION

When a failure in the building envelope occurs it causes extensive problems for building owners/occupiers, contractors and facility managers.

Following the emergency repairs, the cause needs to be identified and a long term repair plan created. Michael Kilbey Associates are specialist cladding and roofing consultants and, with over 21 years' experience in providing expert and accurate advice, we are uniquely positioned to undertake this specialist type of inspection and report preparation.

Our surveyors have many years of experience within the roofing and cladding industry as contractors, surveyors and expert witnesses. This experience gives our clients complete confidence that our reports are accurate and definitive in their content.

Our expertise covers all roofing and cladding types and systems on the market today. With access to the most up to date equipment such as thermal imaging cameras, endoscopes and electronic leak detection you can be sure that the cause of the failure can be identified.
